CAREER OBJECTIVE:

Passionate tech enthusiast specializing in Artificial Intelligence and Machine Learning, with proficiency in Python, TensorFlow, and scikit-learn, and hands-on experience in developing AI/ML models. Strong writing and problem-solving skills, with the ability to quickly learn new technologies and create user-friendly, high-quality documentation. Committed to staying updated on industry advancements and translating complex concepts into clear, accessible content. Looking for a challenging role in the Industry to utilize my skills in AI/ML.

INTERNSHIPS:

Jan'22 - Feb'22

Requirement Validations, Wishwa.org, Hyderabad (IN)

- Performed functional testing of the website.
- Reported defects while testing on different devices and screen sizes.
- Suggested changes and features that would enhance visibility and functionality.

Aug'23 - Nov'23

Internship Certifications, Ethnus, Google developers, remote

- Successfully deployed a fully functional hotel management website using the MERN (MongoDB, Express, React, Node.js) stack.
- Gained expertise in building and deploying web applications with a focus on functionality and user experience.
- Built a smart sleep monitoring app aimed at improving sleep quality through data-driven insights.
- Enhanced skills in Android app development, focusing on user-centric design and real-time monitoring.

Aug'23 - Nov'23

Website development intern, NUNC Systems Private Limited, Hyderabad (IN)

- Learned how to coordinate tasks efficiently and communicate effectively with team members to achieve project goals.
- Gained hands-on experience in working within a collaborative, cross-functional team environment.
- Contributed to building a website similar to Udemy, focusing on delivering an engaging user experience.

WORK EXPERIENCE:

Apr'22 - Jul'23

Design and Content team, Cittaa Health Services Pvt. Ltd, Hyderabad (IN)

- Handling day to day operations by providing assistance on assigning and working with designs for regular instagram posts and marketing.
- Achieved rapid growth with the help of good content and designs for marketing.
- Supported the founder as a co-founder in the starting stages.
- Started as a design team member, in a few months started handling content and became video editing lead with a team of 4 working under my supervision.

ACADEMIC PROFILE:
- Vellore Institute Of Technology Chennai B.Tech CSE specialization in AI&ML
- Intermediate from Narayana Junior College 2019-2021.
- ICSE from Hyderabad Public School, Begumpet 2019.

STRENGTHS:
- Good communication skills and social relationships.
- Excellent analytical skills to resolve issues and enhance user experience.
- Focused on quality and accuracy.
- Proficient in AI/ML development with hands-on experience in AI/ML models.

TECHNICAL SKILLS:

- C/C++, Python, Java, SQL, PHP, Javascript, ReactJs, CSS, Kotlin, TensorFlow, Linux, DevOps.
- Knowledge of neural networks, including CNNs, RNNs, and LSTMs.
- Experience with popular frameworks for building and deploying machine learning models.
- Familiarity with this library for implementing machine learning algorithms and model evaluation.
- Experience in text processing techniques, sentiment analysis, and language models.
- Familiar with MERN for web development and Kotlin for android app development. Built an e-commerce website for a client my work.
- Proficient in Canva, Figma and Photoshop.

HOBBIES:
- Freelancing to build websites and apps for paying customers
- Photography and Playing Football.
